

T CONCEPTS SOLUTIONS

FLEXA

LOCKSET & HINGES

Slender, concise, and succinct; an expression in few words.

We wished to realize a lock of reduced dimensions, aesthetics, and above all, functional minimalism. "FLEXA" is the answer to this challenge. The true innovation lies with the inner "patented" mechanism which allows "FLEXA" to be ambidextrous, silent, and strong. There are three versions: key-key, key-knob, and passage.

We also offer the coordinating hinge and strike plate. The lock, strike plate, and hinge are available for glass thickness 8-10-12.7 mm or 5/16"-3/8"-1/2".
